EDUCATION

London School of Economics and Political Science (LSE) **London, UK | August 2025 – July 2026**

- Master of Science (MSc) Finance and Economics
- Courses: Financial Economics, Financial Econometrics, Financial Engineering, Microeconomics, Fixed Income Securities and Credit Markets, Projects**:** Built python models for USD/INR regression analysis and MBS valuation using Monte Carlo simulation

Indian Institute of Technology (BHU) Varanasi **Varanasi, India | July 2016 – July 2020**

- Bachelor of Technology (BTech) Civil Engineering
- Courses: Engineering Mathematics, Mathematical Methods, Physics: classical, quantum mechanics, Multivariable and Stochastic calculus, Computer programming, Engineering Mechanics, Dissertation: multi-Hazard infrastructure risk modelling (python)

PROFESSIONAL EXPERIENCE

Quantitative Equity Research Intern, Aditya Birla Money Limited **Mumbai, India | June 2024– June 2025**

- Constructed financial models including DCF and 3-statement models, scenario analysis, sensitivity testing and regression forecasting to evaluate valuation drivers and quantify risk-return trade-offs under macroeconomic, company-specific conditions
- Built regression and machine-learning forecasting models in python (pandas, NumPy, stats models) across 20+ KPIs, 4 sectors, and 15+ firms applying feature engineering and out-of-sample validation to lift forecast accuracy and isolate macro sensitivities
- Extracted and processed financial and market data (Bloomberg, industry reports) for 15+ firms, using AI-assisted research workflows and LLMs to summarise filings, support data interpretation and improve the efficiency of investment analysis

IRCON International Limited, Title: Deputy Manager (Projects) **Bengaluru, India | August 2020 – May 2024**

- Directed financial execution of a $35 million infrastructure project (80 km, six-lane highway)**,** managing annual budgets of $12 million, capital allocation and contractor payments, delivering completion on schedule within a 3-year horizon
- Enhanced project returns and liquidity by reducing unit construction costs by 6 to 8% through local sourcing and optimised labour outsourcing, generating $2 to $3 million in cost savings and improving cash-flow efficiency by 10 to 15%
- Implemented financial control and risk-monitoring frameworks, including monthly variance analysis (±3 to 4%), rolling cash-flow forecasts, dispute-escalation mechanisms, improving working-capital efficiency and reducing decision turnaround time by 25%

Engineering Internships, South Central Railway & IIT Hyderabad **Hyderabad, India |June 2018 – July 2019**

- Developed 10+ quantitative models (MIDAS) across 100+ elements and 20+ stress and load scenarios, alongside cost modelling and capital estimation on 3+ rail infrastructure packages early grounding in structural analysis and capital deployment on real assets

PROJECTS

Market Risk Analytics: VaR, Expected Shortfall & FRTB

- Developed a market-risk framework for a £10 million multi-asset portfolio, calculating Historical, Parametric and Monte Carlo VaR, Expected Shortfall and Stressed VaR; conducted scenario analysis, back-testing, Kupiec and Christoffersen validation tests

Japan JGB Yield Regression

- Analysed 10Y, 20Y and 30Y Japanese Government Bond yield changes using inflation, BoJ policy, US yields, FX, oil and risk-sentiment variables. Applied regression analysis to understand fixed-income yield drivers and cross-market macro sensitivities

Fixed Income & Mortgage Valuation

- Modelled mortgage-backed security valuation models using Ho–Lee and Black–Derman–Toy short-rate trees, Monte Carlo simulation and behavioural prepayment assumptions; analysed cash flows, embedded-option risk and interest-rate sensitivities

Other Selected Projects **GitHub: github.com/gourujeevan-cpu**

- Designed a Fama-French factor selection tool using HAC regressions, BIC, LASSO, VIF and out-of-sample testing
- Converted an infrastructure fund liquidity stress-test model into python, modelling NAV, IRR, MOIC and funding requirement
- Random Forest model to predict S&P 500 direction using momentum, moving-average, volatility back-testing a long-only strategy

ACHIEVEMENTS & EXTRA-CURRICULAR

- National award for excellence in execution of the Davanagere–Haveri six-lane NH-48 highway project**,** recognising delivery quality
- Secured All-India Rank (AIR) 4,216 in JEE Advanced 2016, placing in the top 0.5% among 1.2 million candidates nationwide
- Coordinator, Civil Engineering Department**,** supporting 5+ events**,** coordinating 20+ volunteers**,** execution activities at IIT BHU
- IIT BHU football team management, coordinating 15 to 20 players**,** operational support across 10+ inter-college tournaments

ADDITIONAL SKILLS

- **Certifications:** Wall Street Prep (Financial Accounting, DCF, LBO, M&A & Valuation), Bloomberg Market Concepts (BMC), Bloomberg Finance Fundamentals (BFF), Bloomberg Spreadsheet Analysis, Bloomberg ESG Certificate
- **Programming & AI Skills:** python (Pandas, NumPy), C++, Stata, Excel, Bloomberg, MATLAB, GitHub, AI tools/LLMs, LaTeX, AI- supported financial research, time-series and regression analysis, machine-learning forecasting, financial modelling
- **Interests:** Macroeconomics and financial markets; global politics; international political, economic, and business developments
